

The Action Management System

is a combination of three key components;

- (1) a Management Process (the method)
- (2) a Management Computer System (the software)
- (3) a Knowledgebase (the business information)

What do our Clients think?

"The Management Practice was able to create a unique view and perspective of the Far Pavilions business. The subsequent analysis, recommendations and implementation of the Action Management methodologies resulted in a 40% increase in sales and 240% improvement in profitability.

I strongly recommend The Management Practice to anyone or business that wants to dramatically improve their performance and bottom line. I look forward to their continual involvement in the future development and growth of our business."

Michael Edwards
Managing Director
Far Pavilions Pty Ltd

- ❑ Focus on continual improvement
- ❑ Increase your employee's value
- ❑ Make your business worth more

We simply help your whole business run better

1. Our approach was **designed to get everyone to contribute** to managing the business better by stimulating quicker and better execution of plans & actions.
2. AMS creates a systemised environment within which everyone operates. It shows all staff how to **improve their productivity** to become an integral part of the business and to continually increase their overall value to the business.
3. Our system focuses on the essential **operational** running of a business that drives the efficiency needed for greater savings and bigger profits.
4. AMS is a method of **eliminating business risks** to increase business value.
5. Our business processes are supported by an economical **"do-it-yourself" Internet-based computer system** that any business can easily afford.
